## Can that "younger look" be restored?

Now . . . in many cases, yes! For Science has made a revolutionary discovery. Doctors have found there is a "vitalizing" substance that is always necessary for a pretty young skin. Naturally as this substance decreases with age, skins start to dry and look older. But now the ENDOCREME laboratories have found how to bring a counterpart of this substance . . . replacing the natural substance of your skin. It is called ACTIVOL\* and brought to you only by ENDOCREME. Results of its use are remarkable! Skins which lacked this substance begin to look smoother, firmer, fresher again! Many skins take on new appearance of "bloom."
